

PRODUCTS AND SERVICES

SITA-MediCollect supplies a large range of containers (collectors) in a range of sizes and designs to suit your individual waste needs. The containers we supply are designed for safer handling both for the staff in your workplace and for our staff during transportation and destruction.

SITA-MediCollect offers all types of waste collection services, using approved sharps containers (collectors) and recyclable clinical and related waste mobile bins (MGB'S) on a simple and efficient exchange service.

SITA-MediCollect is competent at handling all types of biohazard waste [clinical and related] which can be easily divided into all categories for segregation:

1. All Biohazard Waste: including pharmaceutical, anatomical, cytotoxic and sharps is completely destroyed eliminating any repercussions from infectious waste unlawfully disposed of in landfills. Thermal Destruction [incineration] and Matrix [alkaline oxidation] treatments are offered for peace of mind and assurance against any environmental and financial repercussions.

A certificate of destruction is issued on completion of security/confidential work.

2. Confidential Data: SITA-MediCollect's Disposal Facility guarantees total destruction of all sensitive documents and data. Our process destroys everything with no chance of recognition or reconstruction. There is no need for weighing; this is done on our premises.
3. Sharps: SITA-MediCollect provide standards approved sharps collectors in a full range of sizes, as well as trolleys for large collectors, trolley hanging baskets, and wall-mounting brackets.

ADDITIONAL SERVICES

Witnessed Incineration for all pharmaceutical waste is in accordance with Health Department Guidelines. Pallets of Pharmaceutical waste may be collected by prior arrangement.

Patient records, prescription stationery and other sensitive confidential medical documents can be collected and destroyed. Witnessed destruction of these items can be arranged by appointment.
